- Based on the body of CXP-APE, ICS now releasing a brand new CXP-APE SE with a new M-LOK handguard. The new CXP-APE SE comes in black or grey color options. Also two systems FET and S3 available.
- CXP-APE SE constructed with a high quality full metal aluminum alloy receivers, utilizing the reliable split gearbox for easy to disassemble and convenient to maintain and modify design. The monolithic upper rail featured offers an uninterrupted surface to mount accessories. The CXP-APE SE also improves upon standard M4 platforms by adding ergonomic features such as ambidextrous mag release, charging handle, and fire selectors making it perfect for both left and right handed shooters.
- These components combined provide a very stable, long lasting rifle out of the box. With reinforced Master Mods pre-installed internals on the S3 version, this CXP-APE SE will be an overall very strong external build in addition to a solid internal setup, making this airsoft gun out perform others on the field.

EXP-APE SE

Short Stroke Trigger (SSS Version Only)

Shorter distance trigger travels, faster firing rate you can get. With pre-cocking mechanism, all your moves are able to go like a straight line.

Built-in MOSFET System

Play safe and stay long on the field is the condition not allowed to be compromised. MOSFET has lower resistance that will let the system wastes less power and produce less heat during the operation.

ICS Unique Split Gearbox Design

Simulating action of real firearms is crucial part of gaming experience. The unique ICS-designed Split Gearbox provides simulating action like disassembly of real firearms but also accessibility to quick disassembly for work like maintenance and upgrading.

Gearbox QD Spring Guide Design

The war, the rule is always changing. The QD (Quick Detachable) Spring Guide feature offers player a more efficient way to dismantle and replace the spring to adapt the limitation and requirement of the game in present.

EBB System

The ICS EBB (Electric Blow Back) system brings the most realistic experience to a real firearm without sacrificing the durability and the shooting performance.

Charging Release Button

Spring Release Function

The built-in ICS Spring Release mechanism actively protects the spring, piston and your airsoft investment. Whenever the SAFE mode is selected, the spring is automatically released reducing wear off of the spring, and other internals.
