

LIGHTWAY-DAGGER LIGHTWAY-PELEADOR.III

- The New ICS Dagger comes with 2 different systems, the Mosfet and the SSS. The ICS SSS is programmed with third generation system which comes with Short Stroke Trigger, pre-cocking and Smart Trigger. Topping the Short Stroke trigger with pre-cocking would greatly reduce the shooting cycle giving the user a brand new experience of rapid trigger tapping. While the Smart Trigger can quickly execute a 3 round burst by a single tap; pull the trigger all the way to fire full auto.
- Last but not the least, the ICS dagger was designed for close quarter battle, it is light, robust and yet compact. With the ergo technology, this gun is lightweight and comfortable.

LIGHTWAY

New Designed
Light-weight Polymer
M-LOK Handguard

The newly designed 6-inch reinforced industrial grade nylon fiber handguard has a unique textured design and a trendy outlook. It enhances the product quality and brings a better experience.

Smart Trigger
(SSS Version Only)

The newly developed Smart Trigger that is integrated with the original SSS E-trigger system, can intelligently detect how the trigger has been pulled. In Full-Auto mode, you'll fire continuously in full-auto if the trigger is pressed continuously, and it will fire 3 round burst if you give it a single tap, which is more intuitive and convenient.

ERGO Tactical Stock with
Large Battery Spacing
(SSS Version Only)

The New ICS Ergo Stock has 4 adjustable positions and the battery space is 11*4*3 cm³, which is suitable for most of the aftermarket batteries, giving your AEG the ability to perform with extra power and longer in game use time.

Short Stroke Trigger
(SSS Version Only)

The Short Stroke Trigger that works with the Pre-cocking feature of the SSS E-trigger, can effectively reduce the trigger traveling distance, increase the rate of fire, and greatly enhance the shooting responsiveness and accuracy.

LIGHTWAY

Built-in MOSFET System

Play safe and stay long on the field is the condition not allowed to be compromised. MOSFET has lower resistance that will let the system wastes less power and produce less heat during the operation.

T-Dean Plug(Standard for SSS, MOSFET)

ICS Unique Split Gearbox Design

The unique ICS designed split gearbox, provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

Pressing Forward Assist Knob to Release Spring Tension

Releasing the spring tension by pressing forward assist knob to avoid spring elastic fatigue.

CFS Foldable Sights

Reinforced polymer made CFS foldable sights for M1913 Picatinny Rail system, which not only provides lighter weight, sturdy durability, more compact profile while folding, but also provides the capability to mount the optic sights and still aimable while folding!
